Give the Baby Water.

From the Medical Classics. It is a mistake to suppose that because milk is a liquid food it is at the same time drink which is capable of satisfying the thirst of infants. It is thirst which causes healthy, breast-nourished in-fants to cry for long periods of time in many instances. There are many cases of indigestion due to weakness or insufficiency of the child's gastric juice, which would be greatly benefited or even cured if the child were allowed an occasional drink of water.

OLD GENT'S TIES

The assortment that is here would be incomplete if in it there was not a full line of low-cut, broad and flexible buttoned shoes with soft, pliable uppers—shapes specially adapted to meet the requirements of those afflicted with corns, bunions, sensi-tive joints or rheumatism, and to whom positive ease and comfort is a boon devoutly wished for. Here's a shee that helps to supply the want-Old Gent's Ties, made of glove calf, old Gent's Ties, made of glove calf, a soft, yielding leather, with good plump soles, extra wide and flexible; have good counters; inner soles equal in smoothness to best hand-sewed work; style is not it's forte, but for ease and comfort-giving and excellent wearing qualities has few equals. Cheap too, grade considered, at \$2.50. And still another of which to tell you lower in price-\$1.50. Calf Strap Ties—the uppers of very light weight skin, that readily conforms to shape of foot the first time worn without hurt to sensitive parts of foot. Have good broad bottoms, and while not recommended for extremely hard wear, will not fail to prove a good money's worth, Serge Congress and Serge Boots are here, too—the coolest shapes in foot-wear known. While not as popular now as in days gone by, we keep a full assortment to supply those who will have nothing else. More kinds will have nothing else. More kinds of comfortable foolwess are here with special restures to recommend them. Of them we'll have something to tell at a future time. Try us for comfortable shoes.
